Updates to Metropolitan Statistical Areas have been implemented during the annual revisions to the Local Area Unemployment Statistics (LAUS) data. The changes are outlined in OMB Bulletin No. 23-01. The bulletin comes from the Executive Office of the President, Office of Management and Budget and outlines changes made to statistical areas throughout the United States. A link to the bulletin is provided below.

Bureau of Labor Statistics statement: "Due to methodological changes and conversion to the 2020-based Office of Management and Budget (OMB) delineations, smoothed seasonally adjusted data for metropolitan areas and metropolitan divisions will not be updated in conjunction with the January, February, or March 2025 news releases, and may not become available again until a few months thereafter. The tables below containing data for the 2010-based OMB delineations were temporarily removed on March 17, when the not seasonally adjusted data were converted to the new geography in the BLS time-series database. For the March 17 conversion of the not seasonally adjusted data, the 2020-based OMB geographic areas were aggregated from their county components back to the series beginnings. Subsequently on April 18, the not seasonally adjusted data from 2016 forward will be comprehensively revised, reflecting input replacement and re-estimation based on the new geography. The not seasonally adjusted data are the inputs to the smoothed seasonal adjustment models, and the process of re-specifying these models cannot commence until the comprehensive revisions to the not seasonally adjusted input data based on the new OMB geography become available. This notice will be updated once we have a date for the resumption of publication of the smoothed seasonally adjusted data. Thank you for your patience during this process." Link provided below.

\* Hours and earnings estimates are produced for all employees in the private sector, for production employees in Manufacturing and Mining and logging, for construction workers in Construction, and for nonsupervisory workers in private, service-providing industries. The estimates are derived from reports of gross payrolls and corresponding paid hours. The payroll for employees covered by the CES survey is reported before deductions of any kind, such as unemployment insurance, withholding and social security taxes, health plans, union dues, or retirement plans. Included in the payroll reports is pay for overtime, vacations, holidays and sick leave paid directly by the firm. Bonuses, commissions, and other types of non-wage cash payments are excluded unless they are earned and paid regularly (at least once a month). Employee benefits paid by the employer, as well as payments in kind, are excluded.

Total hours during the pay period include all hours worked (including overtime hours), and hours paid for holidays, vacations, and sick leave. Total hours differ from the concept of scheduled hours worked. Estimates of average weekly hours reflect effects of numerous factors such as unpaid absenteeism, labor turnover, part-time work, strikes, and fluctuations in work schedules for economic reasons. Overtime hours in Manufacturing are collected where overtime premiums were paid if hours were in excess of the number of straight time hours in a workday or workweek.

-- U.S. Bureau of Labor Statistics

† Some Metropolitan Area hours and earnings data have been suppressed due to a processing error in the calculation of the estimates that was discovered.

It is anticipated that the estimates will be corrected and released as part of the annual benchmark release.

-- U.S. Bureau of Labor Statistics
